

SUNBELT RENTALS EXPRESS

HIRE | BUY | 24/7

ESSENTIAL EQUIPMENT AT YOUR FINGERTIPS

Imagine having your own Sunbelt Rentals store on-site 24/7. That's what Sunbelt Rentals Express gives you. Quick and easy access to essential equipment, day and night.

We start by installing a hub on your site. It's configured to your needs and stocked to your requirements with whatever products you need, such as PPE, power tools, spare parts and critical safety equipment.

With Sunbelt Rentals Express you're in control, so you can change your stock as you choose – and even use it as a handy store for your own equipment.

For all your essential site equipment at your fingertips, you can leave the how to us.

Less downtime, greater efficiency

Nothing's more frustrating than having people on-site without the right equipment.

Making orders and waiting for deliveries can cost considerable time and money. But with Sunbelt Rentals Express, the essential kit your team need is at their fingertips. Stock can be remotely monitored and reordered automatically, saving more time.

Maximise safety, compliance and sustainability

We understand the importance of safety and compliance on site, it's our number one priority. With every item fully traceable, you'll know precisely how many times equipment has been used, by whom and when it needs servicing or replacing.

Through unique access cards you'll be able to pre-programme relevant permissions to ensure your team can only access equipment they are authorised and trained to. Whilst they are more likely to take greater accountability for assets hired under their name, reducing waste and enabling damage to easily be reported and tracked.

With less deliveries to site you'll also have less emissions, noise and disruption.

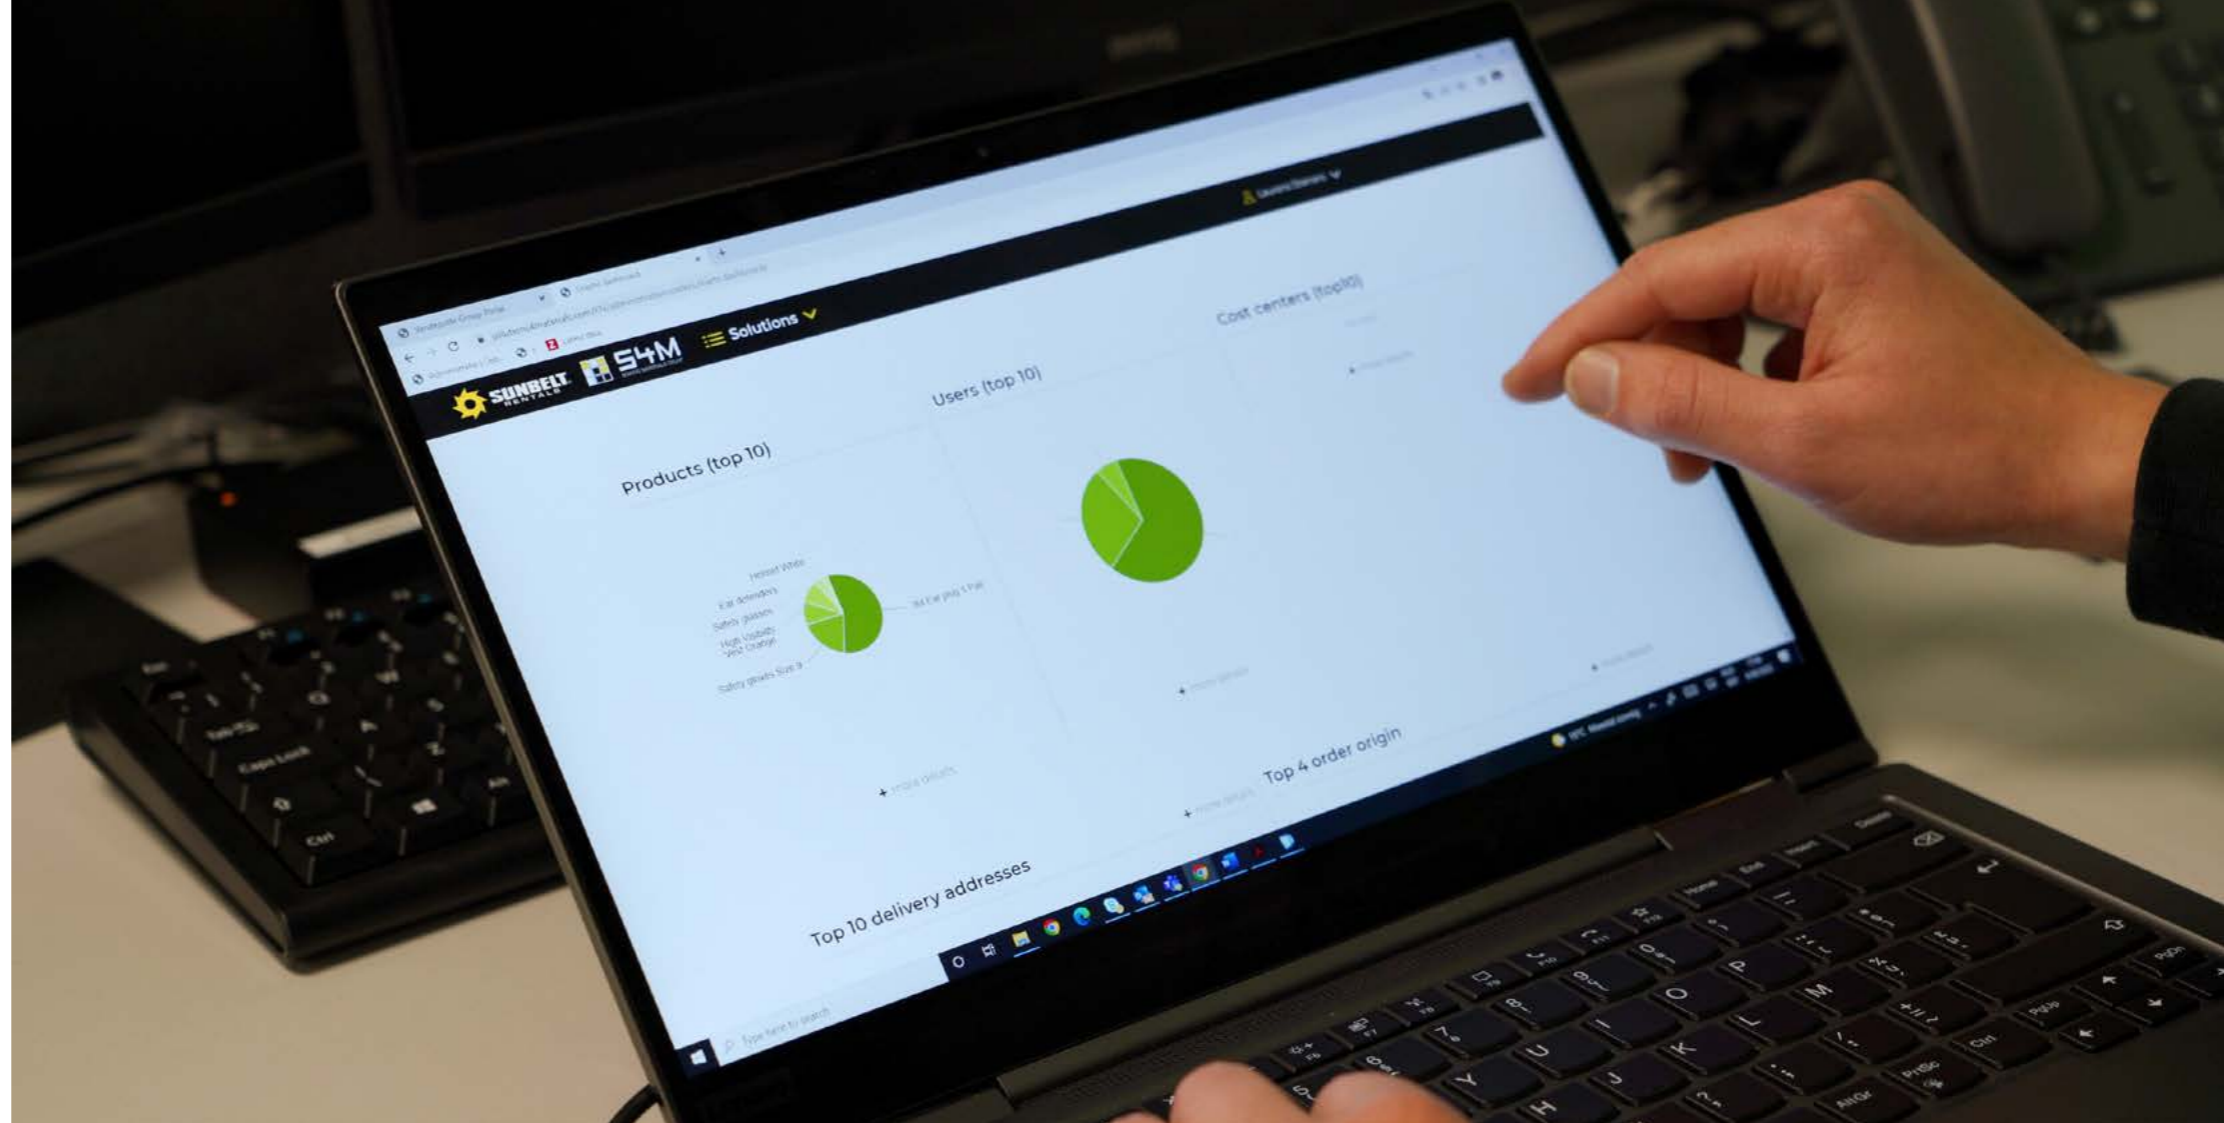

REAL-TIME REPORTING AND SPEND CONTROL

Our goal is to support you with reducing downtime, improving efficiency and driving cost-savings to keep your site running smoothly at all times.

Our built-in reporting software is accessible anytime, anywhere and on desktop and mobile devices. Track equipment usage to plan for upcoming work, view stock levels to ensure you're prepared, and see your real-time spend to avoid any surprises at the end of your project.

You'll also be able to see who last took an item to reduce equipment loss and replacement costs.

HOW DOES SUNBELT RENTALS EXPRESS WORK?

1. A pre-site survey is carried out to understand your requirements.

2. The Sunbelt Rentals Express is customised to your needs and delivered to your site.

3. You'll be trained on how to use the Sunbelt Rentals Express by our expert team.

4. Once trained, you'll be issued with your own unique access card with all relevant permissions pre-programmed or connect to your existing site access cards.

5. Navigating a simple digital display, you can see what equipment is available and select the item you need.

6. A secure locker will open to allow you to collect the item. When you've finished, simply return the item to the Sunbelt Rentals Express.

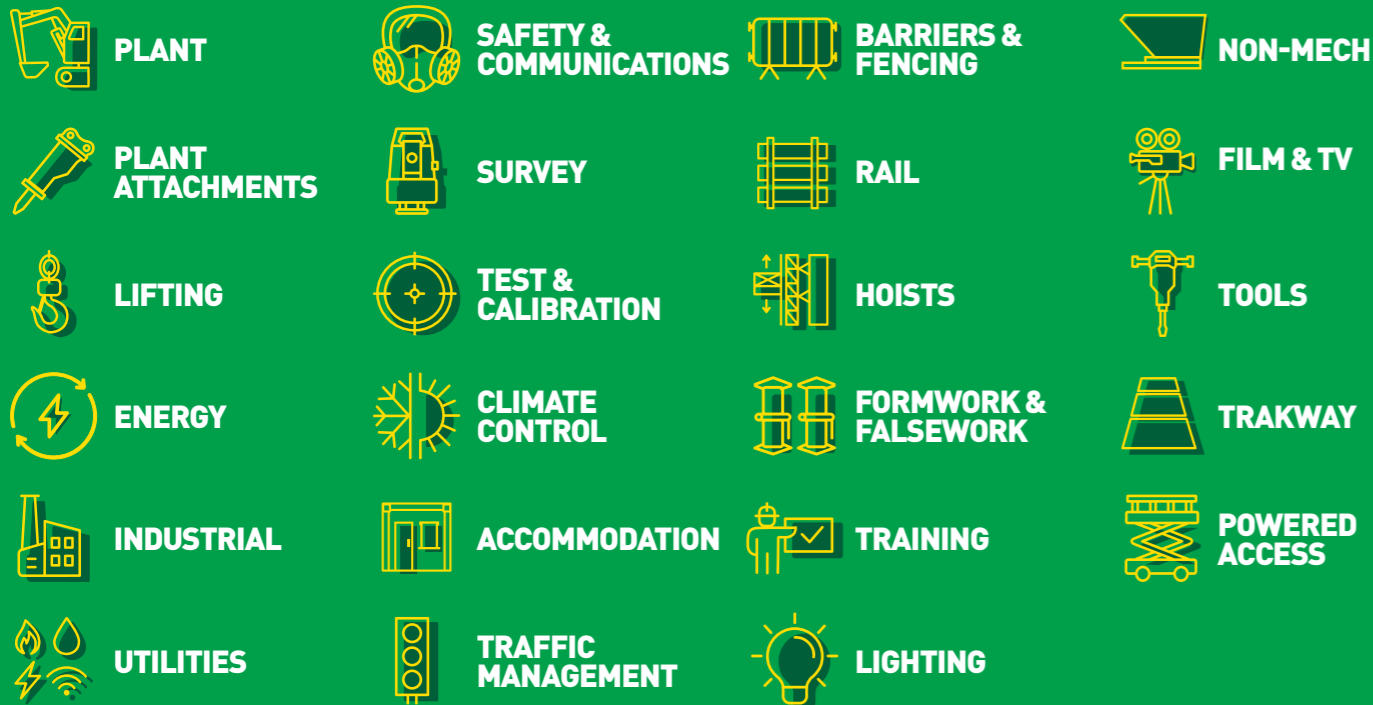

7. When an item is out of stock Sunbelt Rentals can dispatch a delivery to top the Sunbelt Rentals Express back up.

8. You can access real-time reports to track spend, monitor equipment usage and compliance, as well as see who has items on hire.

PROVIDING RENTAL PRODUCTS AND MANAGED SOLUTIONS INTO EVERY MARKET AND SECTOR

OUR PLANET IS OUR COMMITMENT

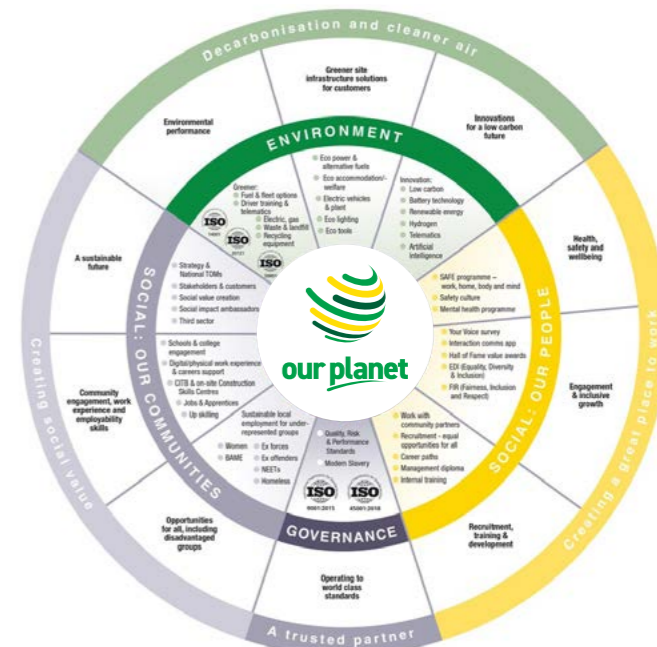

We are totally committed to acting responsibly and sustainably.

It's in our DNA - so much so that 'being responsible' is one of our core values. Everything we do is the right thing for our people, for you, for our communities and our planet.

Our Sustainability Plan 2030 aligns with eight of the 17 UN Sustainable Development Goals.

We are striving to create social impact, report social value and achieve lasting legacies through our day to day work.

We are already making a big difference in these areas, but through our strategy are focused on achieving more.
