# INDUSTRIAL SOLUTIONS

## WORK WITH US ON YOUR NEXT INDUSTRIAL PROJECT

At Sunbelt Rentals, we offer comprehensive safety services tailored to your project's needs. We specialise in total material management through a team of onsite specialists, dedicated and trained in the upkeep and control of safety-critical equipment, ensuring complete asset traceability and full maintenance compliance.

Our commitment to innovation and leading-edge technology continuously paves the way for world-class equipment supply and unparalleled industrial safety solutions. Whether you're working in extreme industrial environments, during short term critical maintenance periods or everyday operations, quick access to safety-critical equipment is vital. Equally crucial is the professional upkeep and function testing conducted by competent personnel, ensuring the highest compliance standards throughout the equipment's lifecycle.

# TURNKEY INDUSTRIAL SAFETY

## Trained Experts

Our extensively trained team is available 24/7 onsite, with a focus on material traceability and compliance upkeep. Whether handling specialist breathing air equipment or specific gas detection monitors, our fully manufacturer-trained professionals provide repair, service, and upkeep of your equipment, offering invaluable support throughout critical maintenance periods or as key contributors to year-round operations.

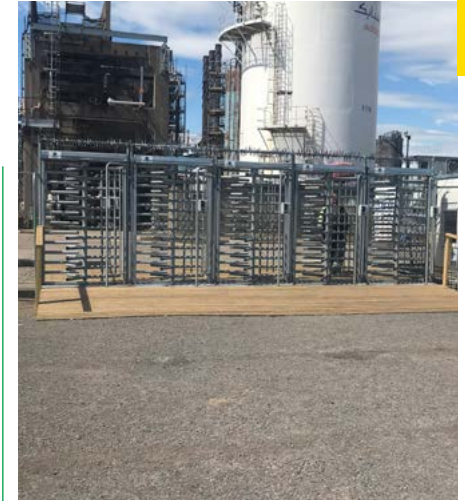

## Breathing Air Systems Support

Breathing air systems are crucial for safety but pose significant risks without proper setup, monitoring, or maintenance. In addition to one of the largest fleets of specialist breathing air assets in the UK, Sunbelt Rentals offers a fully mobile and state-of-the-art Breathing Air (BA) Onsite Support Centre. Utilising this our BA specialists provide 24-hour assistance with, rapid filling, specialised cleaning, drying, and comprehensive dynamic testing of all breathing air systems and their accessories. Project applications include assistance with temporary breathing air trailer operations and or the setting up of more complex permanent systems.

## Digital Confined Space Monitoring System

During industrial plant maintenance shutdowns, where large contractor groups work in confined spaces, strict safety measures are critical to avoid delays and unexpected costs. Our Digital Confined Space Monitoring System enhances work safety, creates efficiencies, and reduces project costs. The system integrates advanced access control, two-way communication, camera visuals, and continuous gas detection technology. Monitored 24/7 in an onsite control room, this system is known for reliability, mobility, and adaptability, suitable for large turnarounds and or smaller specialised tasks such as tank maintenance projects.

## Access Control

Access control systems enhance industrial security by regulating facility access, limiting it to authorised personnel through secure credentials like key cards and mobile devices. These systems can be configured for emergencies, triggering lockdown procedures or facilitating quick exits. Beyond immediate security benefits, they prevent vandalism, unauthorised usage, and safeguard sensitive information, serving as a robust layer of physical security. This ensures comprehensive protection for both personnel and assets in industrial environments.

# TOTAL MATERIAL MANAGEMENT

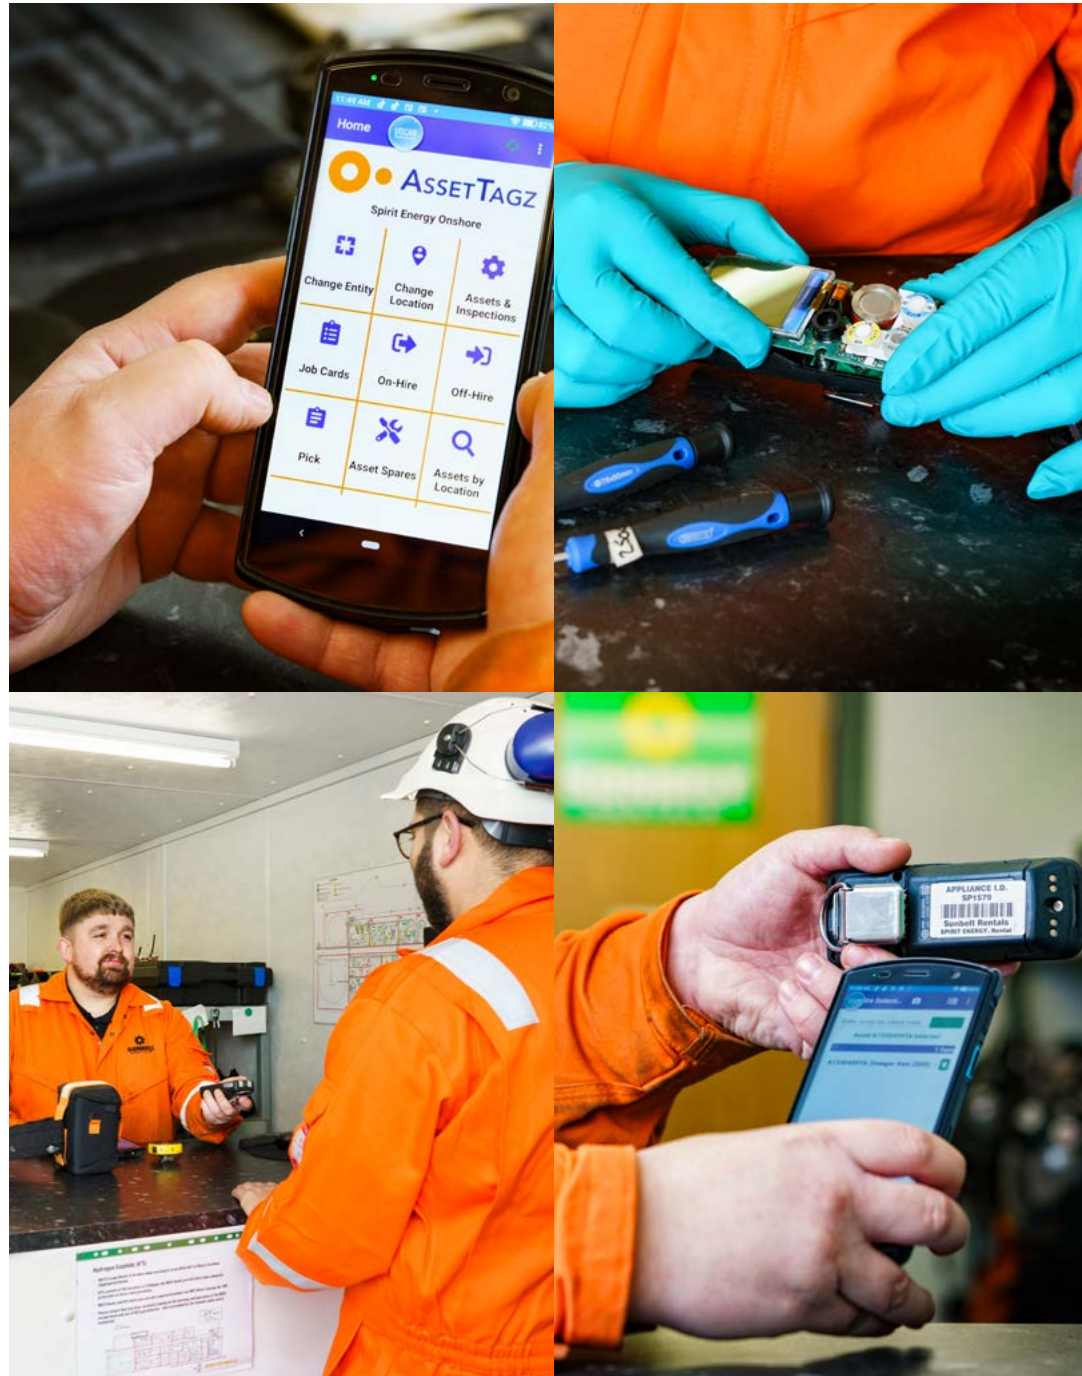

Simplifying the management of high-value safety-critical equipment, our Total Material Management solution has lots of benefits, including:

## Loss Prevention

By shifting accountability to equipment receivers and their contracting companies, we encourage the safe return of high-value, safety-vital equipment while minimising financial losses.

## Onsite Expertise and Technology

Our technology seamlessly integrates with our onsite specialists, offering a holistic, turnkey solution that combines state-of-the-art technology with expert support. This approach allows you to manage both large and small safety-critical and communications equipment through a central Onsite Safety Support Centre, ensuring full traceability of customer-owned and hire fleet assets.

## Service Schedules and Compliance

We store service schedules and employ a state-of-the-art track and flag system to ensure complete compliance to protect both end users and adopting sites. Our robust system also handles damage reporting and fault-finding management, tracing issues directly back to the returning user.

## Versatility for All Environments

Powered by a bespoke market-leading app, compatible with both ATEX android or apple tablets the software is completely linked to an access anywhere cloud-based system allowing live data updates. The equipment is tracked by a dual link rugged bar code system that can withstand the harshest of conditions, perfect for use within industrial environments whatever the duration of the project.

# ONSITE SAFETY SUPPORT CENTRE

Our Onsite Safety Support Centre is the centralised hub for all your equipment needs. Staffed by a team of experienced experts, we take the worry out of material management by providing a one-stop location for essential distribution, repair and maintenance of equipment using a bespoke material management software solution.

- Onsite experts prioritise your safety, 24/7.
- Product range tailored to your requirements, from gas detectors to fall arrest equipment.
- Complete compliance with daily issuing, testing, and maintaining of equipment.
- Data-driven insights via reports to optimise your fleet and plan for future needs.
- Fully traceable equipment to minimise losses and reduce costs related to unreturned items.

# HOW WE IMPLEMENTED ASSET TRACKING FOR CRITICAL SAFETY EQUIPMENT DURING AN ON AND OFFSHORE SHUTDOWN.

In September 2023, Spirit Energy, a leading offshore operator with over 30 years of experience in the UK, executed a successful shutdown.

Throughout the shutdown, Sunbelt Rentals took on the responsibility of supplying and managing safety-critical assets onshore and offshore. Our expert team ensured compliance, handled issue/return procedures, and provided asset traceability support using Assetagz software. This tool allowed approved users to effortlessly scan items, flag service events for compliance, and generated daily reports for enhanced efficiency, monitored fleet utilisation, reduced turnaround times, and forecasted equipment needs.

## Results

Combining Assetagz technology with on-site expertise, Sunbelt Rentals significantly contributed to eliminating safety-related stoppages and reducing loss costs by 40% compared to pre-service implementation.

# PROVIDING RENTAL PRODUCTS AND MANAGED SOLUTIONS TO THE INDUSTRIAL SECTOR AND BEYOND

**Industrial**  
On your site to meet the demands where every second counts

**Safety & Communications**  
Knowledgeable and experienced specialists in this field

**Energy**  
From fuel saving cleaner energy solutions to the latest stage v generators, we have a temporary power solution for every site

**Tools**  
We offer local tool hire, from battery-powered hand tools to compressors, compactors, and cleaning equipment.

**Test & Monitoring**  
Europe's leading test equipment specialists since 1996

**Lifting**  
Our solutions have been used on 7/10 of the tallest buildings in the UK

**Training**  
Dedicated Health and Safety training to qualify our own people and our customer's people

**Powered Access**  
The combined height and reach of our equipment can transport you safely over 50,000 metres

**Accommodation**  
24/7/365 call out facility covering 20,000 items on fleet

**Lighting**  
The UK's largest fleet of state-of-the-art tower lights, including a wide range of solar, hybrid and plug-in options

**Climate Control**  
Economical and efficient temperature control and HVAC solutions

**Plant**  
The widest range of plant including the latest stage v and battery powered machines in the UK

**Flooring Solutions**

**Plant Attachments**

**Rail**

**Utilities**

**Film & TV**

**Survey**

**Hoists**

**Formwork & Falsework**

**Non-Mech**

**Barriers & Fencing**

**Trakway**

**Traffic Management**
